

SEPTEMBER BACK-TO-WORK SALE September 2020

Great deals on our remaining End-of-Line, Ex-demo and Come-In-Useful-One-Day units.

After the office deep-clean, moving all our data to the cloud, redesigning our invoices and delivery notes, stepping up our IT security and taking the first steps towards a paperless office, it was time to find homes for the superfluous demo units, end-of-line stock and those things that were now unlikely to come in useful. So, we offer them here at great prices.

Grab them while you can.

Please read the Notes at the end of this document before placing your order

DirectOut Technologies

(All prices are EXCLUDING VAT and Delivery)

The units tagged *(Silver)* or *(Green)* are in the original DirectOut livery, not the current black design as shown on the Aspen Media and DirectOut websites.

**Sale Price
Excl. VAT**

Miscellaneous – The one-day-they’d-come-in-useful never came...

Atacama Nexus Speaker Stands	Pair of short floor-standing speaker stands – top plate roughly A5 size; height 60cm Marked/tatty		£30.00
Genesis Pro System DPM101	LED OEM freestanding Meter with over-sampled measurement AES3 IP and Loop-thru As new – but without outer cosmetic side/top panel		£250.00
ReAn Bantam Patchbay	Unused 96-way 1U Bantam Patchbay – solder-tag terminations		£150.00
TC Electronic Unity	Audio reverb (and dynamics?) processing card for the Yamaha 02R. No external connections. This is offered at no charge because we have no way of confirming whether it has retained the license required to activate the basic functionality or if other licenses have been activated. If you have a Yamaha 02R of the required vintage you’re welcome to this with our good wishes and just the cost of delivery (£15).		No Charge Delivery £15
Leema Xyps	Pair of Pre-Production samples of the Xyps by Leema Acoustics, a spin-off from Magtrax, the manufacturer of surround monitoring controllers in the noughties and now a highly regarded craft HiFi brand. Not been used for a few years but were a fine pair of speakers according to those who have professional ears. Collection only or request delivery quote Save ~85% (£560)		£100.00

Notes

Payment

Payment can be made by Mastercard and Visa debit or credit cards; or directly to our bank account. We will provide our bank details with our order confirmations.

Delivery

The majority of these items will be delivered to UK mainland addresses for £15 + vat. The cost for shipping to other addresses can be quoted on request.

Collection only

Some items marked *Collection only* do not have any packing or the packing cannot be trusted for delivery via normal couriers. These items are for collection only, from our offices at **HP22 4LW** or **W3W: ///PLOTING.SPEARING.SWEETEN.**

Savings value

The stated savings are estimates only and are compared to the List Price from our records.

Condition

Except where stated in the description, all items are in good condition, some are new or close to pristine, but most will show the marks of being installed in racks for exhibitions and demos. If the physical condition is important to the purchase, please ask for more specific details.

Finish

The finish of the DirectOut units has changed from a silver/green or green livery to black. Many of the ex-demo or end-of-line units are the earlier silver/green or green finishes.

Firmware

As manufacturers continue to release firmware updates that are relevant to older products, we recommend that you check the respective manufacturer’s websites for the latest versions and install these if appropriate; so you can benefit from the latest features and possibly new functions.

JLCooper Controllers

The RS422 VTR-style controllers use the Sony 9Pin/P2 control protocol and can be used with devices that support this.

Other JLCooper controllers either connect to mapping software installed on the computer hosting the application to be controlled or are integrated directly by the software developer.

For these latter controllers JLCooper.com has comprehensive [Legacy Manuals](#) and [Downloads](#) pages, but we can give no undertaking about compatibility with other devices, software or operating systems. However, we are happy to share whatever information we have in our archives – please ask. But we and JLCooper are unable to provide support beyond this.
